PROJECTS

Arunachala Tractor CRM

[GitHub](#)

Next.js, Express.js, PostgreSQL, AWS

- Built full-stack CRM for tractor service management
- Implemented RBAC authentication for admins and staff
- Added service scheduling, due tracking, and call logs
- Deployed scalable frontend/backend infrastructure using AWS + Vercel

Gym CRM Application

[GitHub](#)

Full-stack management system for gyms

- Built using Next.js and serverless APIs
- Developed features for member management, plan creation, task assignment, and payment tracking
- Included admin authentication and dashboard system

Wedding Bells – Event Management Platform

[GitHub](#)

- Built a MERN stack booking platform with role-based access (Super Admin, Admin, User)
- Implemented JWT authentication and Redux-based state management
- Designed responsive UI using Tailwind CSS

TenMillions – E-commerce Platform

[Live Demo](#) | [GitHub](#)

- Developed a full-featured e-commerce platform using Node.js, Express.js, MongoDB, and EJS
- Implemented secure authentication, Razorpay payments, and admin dashboard
- Designed responsive UI with optimized user experience
- Deployed on Render

Company Websites (Next.js Projects)

Heavenstone

[Live Demo](#)

- Developed a static company website using Next.js
- Integrated a pre-trained chatbot for user interaction

Al Eliza Interiors

[Live Demo](#)

- Built a responsive Next.js company website

IP Technics

[Live Demo](#)

- Built responsive and SEO-optimized Next.js website with improved page load performance and structured content with blog system
- Integrated Google Reviews directly into the website to enhance credibility and user trust

Difuse

[Live Demo](#)

- Built a Next.js website with dynamic blog integration

Prism of Stories

[Live Demo](#)

- Designed and developed a modern Next.js company website

Perfetto Events

[Live Demo](#)

- Designed and developed a modern Next.js company website

OPEN SOURCE CONTRIBUTIONS

Kalmia

[GitHub](#)

- Contributed to frontend using React.js
- A documentation CMS written in Go with support for multi-user and multi-version documentation
- Includes markdown editor for content management

Sylve

[GitHub](#)

- Contributed to frontend using SvelteKit
- Open-source virtualization platform for FreeBSD using Bhyve, Jails, and ZFS
- Designed to provide a Proxmox-like experience

Signify

[GitHub](#)

- Contributed to frontend using Svelte
- Tool for generating professional email signatures (HTML & image export)

Sylve.io Website

[Live Demo](#)

- Built using Astro, Svelte, and Starlight
- Developed documentation-focused frontend

EXPERIENCE

Difuse (Iridia Solutions)

Full Stack Developer

May 2024 – Present

EDUCATION

Bachelor's Degree in Commerce

MG University

2017 – 2021

CERTIFICATIONS
